Courte description

1.3 Megapixel resolution Robust metal housing 395nm + white LEDs 10-90x magnification Long working distance

Description

The VW series has two types of LED lights that are switchable between white and UV light. This model has a long working distance and a filter to filter out the returning UV light so that an image with natural colors can be obtained. The aluminium housing offers enhanced protection and durability and has the best look and feel.
