Ürün Kodu: AM7515MZT2P

Short Description

5 Megapixel Edge sensor Aim point laser (APL) Integrated polarizer 130x ~ 220x magnification Automatic Magnification Reading (AMR) Flexible LED Control (FLC)

Aç?klama

Integrated with Aim Point Laser (APL), the AM7515MZT2P eases the tasks of locating and focusing the target under the microscope. The AM7515MZT2P is a 5MP microscope with a $130x \sim 220x$ magnification range featuring AMR, FLC, APL, metal housing and a polarizer.

The AM7515MZT2P is part of the universal range and with its standard working distance and wide magnification range from $130x \sim 220x$, it is suitable for a wide range of applications. Because of the built-in polarization filter this model is ideal when working with shiny or reflective objects such as metal, plastic, glass, jewelry, electronics, etc. The AMR function is of particular importance when the measurement functions are frequently used. The Aim Point Laser (APL) is an integrated trough-lens laser projecting a red dot that provides a visual reference point for the positioning and focusing of the target.

The main features of the AM7515MZT2P are:

- 5 Megapixel Edge sensor
- 130x ~ 220x magnification
- Integrated polarizer
- Aluminum housing
- Automatic Magnification Reading (AMR)
- Flexible LED Control (FLC)
- Aim Point Laser (APL)
- Extensive measurement functions
- Calibration
- Exchangeable front caps
- And more...
